INTRODUCING

Fortify
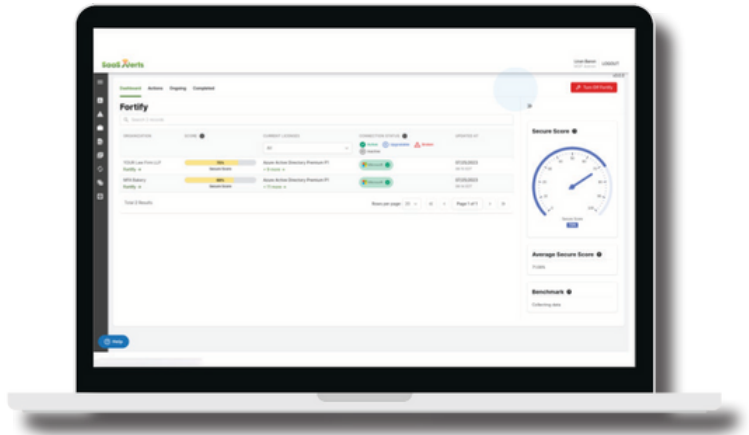

Say hello to **Fortify**, the groundbreaking SaaS Alerts' solution that simplifies Microsoft security recommendations and saves you valuable time. As threat actors increasingly target Microsoft 365 to breach small and medium-sized businesses, safeguarding your managed Microsoft tenants has never been more crucial. As an MSP, you're at the forefront of the cybersecurity battle and need efficient tools to protect your clients swiftly and effortlessly. Fortify gives you the power to apply Microsoft security recommendations across all your clients in just minutes.

Experience the benefits of Fortify firsthand with our free trial. Discover how this advanced module can revolutionize your approach to Microsoft 365 tenant security.

CORE FEATURES

STREAMLINE MICROSOFT SECURITY RECOMMENDATIONS
Fortify allows you to apply Microsoft security recommendations across all your tenants in minutes. Elevate your clients' security posture quickly and efficiently, freeing up valuable resources.

MICROSOFT SECURE SCORES COMPARISON
Stay informed with a comparison of your clients' Microsoft secure scores, comparing them against similar-sized companies. Alerts will notify you of any score regressions, enabling you to take immediate action to maintain optimal security levels.

ORGANIZATION VULNERABILITY ASSESSMENTS
Fortify provides built-in assessments to facilitate sharing of Microsoft secure scores and recommended security protocols with clients. Encourage your clients to upgrade their Microsoft licenses for heightened security.
