

INTRODUCING

Fortify

Say hello to **Fortify**, the groundbreaking SaaS Alerts' solution that simplifies Microsoft security recommendations and saves you valuable time. As threat actors increasingly target Microsoft 365 to breach small and medium-sized businesses, safeguarding your Microsoft accounts has never been more crucial. As an IT professional, you're at the forefront of the cybersecurity battle and need efficient tools to protect your organization swiftly and effortlessly. Fortify gives you the power to apply Microsoft security recommendations across all your end users in just minutes.

Experience the benefits of Fortify firsthand with our free trial. Discover how this advanced module can revolutionize your approach to Microsoft 365 security.

CORE FEATURES

STREAMLINE MICROSOFT SECURITY RECOMMENDATIONS

Fortify allows you to apply Microsoft security recommendations across all your accounts in minutes. Elevate your organizations' security posture quickly and efficiently, freeing up valuable resources.

MICROSOFT SECURE SCORES COMPARISON

Stay informed on changes to your Microsoft secure scores while comparing them against similar-sized companies. Alerts will notify you of any score regressions, enabling you to take immediate action to maintain optimal security levels.

ORGANIZATION VULNERABILITY ASSESSMENTS

Fortify provides built-in assessments to facilitate the sharing of Microsoft secure scores and recommended security protocols with your leadership team. Get recommendations about Microsoft licenses and other tactics for heightened security.
